SATA

General Information

Technical Information

As most end-users use quick couplings, SATA spray guns are generally supplied with air inlet G 1/4" male thread without hose screws.

Terms of Delivery

All indicated prices are ex works. They exclude packaging, freight, shipment and insurance cost. The general terms and conditions of delivery and payment apply exclusively. They can be viewed at www.sata.com/LZB. We object to any other purchasing conditions.

Prices

All prices in this list are recommended prices only and will be valid for the indicated period of time. All prices are quoted exclusive of VAT. We reserve the right to change prices at any time and without prior notification.

Small Order Policy

Small orders below a value agreed with the customer (list prices excl. VAT) will be invoiced at gross list prices without discount. In case that nothing has been stipulated with the customer, a minimum order value of 2.500.00 € applies.

Exchange/Return

We only accept return and exchange of products upon prior written authorisation by SATA. Goods for refund must be returned in unused, pristine condition and in their original packaging. Outdated, used or damaged parts will not be accepted for return. For the return of products which have been incorrectly ordered, or for other reasons which we cannot be held responsible for, a charge of 20 % of the net purchase price will be levied to cover inspection and administrative costs. A handling charge of minimum 60.00 € will apply in any case for each transaction.

Errors, technical modifications and printing errors reserved.

Spray Guns

Robust air cap made of chrome-plated brass with **QC™** air cap thread for quick change with one turn only.
Air cap ring:
green = HVLP technology
blue = RP technology.

Fluid tip and paint needle made of corrosion-resistant stainless steel.

Material passage (red)

Air passage (blue)

Fluid tip seal ensuring minimal cleaning effort and safe colour change.

Low maintenance, self-adjusting sealings at air piston and paint needle.

Gun trigger with paint needle guard ensuring increased life time of the paint needle packing.

Option: Digital pressure display for exact pressure adjustment, perfect colour match and reproducibility.

CCS™ – Color Code System. For the convenient identification of your spray gun.

QCC® – Quick Cup Connector. Bayonet cup connection. Ensures quick and clean cup change as well as easy cleaning.

Gun suspension hook for convenient storage.

Control elements can be perfectly adjusted even wearing gloves. Improved material flow control.

Air micrometer for the adjustment of the atomisation air. Highest precision with digital pressure gauge (**optional**).

Spray fan control allowing fine adjustment with a half turn only.

Ergonomically shaped gun handle.

Easy to clean, corrosion-resistant anodised surface.

Air connection 1/4" male thread with swivel joint.

Warranty: Talking quality is not enough – we guarantee it: for three years with registration!

1+2=**3** PREMIUM WARRANTY

SATA

Spray Guns	Product description	Product advantages
SATAjet X 5500 PHASER 12	The PHASER spray gun was developed with its special design, special materials and a special concept for your very special projects. Technically is the PHASER identical to the top model SATAjet X 5500. It has the same nozzle concept and all the other convincing features that make the SATAjet X 5500 an outstanding spray gun.	· Unusual design – combined with high-quality materials and detailed solutions · Revolutionary, economical, quiet, consistent – technically identical to the top model SATAjet X 5500
SATAjet X 5500 14	The SATAjet X 5500 is the latest SATA paint spray gun for highest demands. With the X nozzle system, painters are able to cope with all paint systems and application recommendations. In addition, the whispering nozzle noticeably reduces the noise level and gives bodyshops a softer, more pleasant painting feeling - all this with reduced material consumption.	· Revolutionary: The atomization of the X nozzles sets new standards · Noticeably quieter: Whispering nozzle due to optimised flow geometry · Precise: Optimised material distribution for enhanced spraying uniformity and atomisation with both spray fan shapes · Low maintenance: No air distribution insert required · Consistant: Constant fan size across the entire nozzle spectrum with linear increases of the material flow rate · Efficient: Considerable material savings with the same application method
SATAjet 3000 K 16	With this high-performance paint spray gun designed for use with remote tanks or pump systems you can achieve high-quality paint jobs on large surfaces. The stretched spray fan with finest material atomization results in a perfect surface quality with homogeneous paint flow. The robustness, the low maintenance requirements and the ergonomic balance of the SATAjet 3000 K are ideal prerequisites for continuous use in industry and trade.	· Processing of all paint systems with sprayable viscosity · All material passages are made of stainless steel and are therefore corrosion-resistant · Extremely robust spray gun model with axial round/flat spray control · Ergonomically balanced, easy handling of the control elements
SATAjet K 1800 spray mix 18	SATA introduced the new SATAjet K 1800 spray mix, an innovative new product in the field of ultra-high pressure coating. The new lightweight gun in this spray gun class with its well-balanced gun body combines an optimised ergonomic design with a finely-tuned nozzle range and with the innovative clampLock paint needle system.	· Ergonomic design with a well-balanced gun body · Low spray gun weight · Single-axis trigger system for low trigger forces and fatigue-free working · Innovative, two-part clampLock paint needle system · Material connection system for gap or inline filter · Material connection 1/4" - 18 NPSM (male thread) / air connection 1/4" (male thread)
SATAjet 3000 K spray mix 20	The SATAjet 3000 K spray mix is a high-pressure spray gun with supporting air atomisation, ideally suited for the application of large quantities of highly viscous materials.	· The SATAjet 3000 K spray mix can be used either as an airless or compressed air-assisted high-pressure spray gun due to the optionally switchable atomizing air. · The fan size can be adjusted with compressed air support via a round/wide fan regulation · High material application rate with low-overspray · Suitable for solvent or water-based coating systems · Wide range of nozzles with different spray fan sizes allow the perfect adaptation to the object

Spray Guns	Product description	Product advantages
SATAjet 1000 B 22	The SATAjet 1000 B gravity fed spray has been specifically developed for the LIC/Industrial/wood coatings markets. Thanks to the very wide range of nozzle set sizes, extensions and the possibility to equip with both a pressurized gravity cup or a gravity cup with a pneumatic stirrer almost all available coatings can be sprayed from low-viscosity wood stains and clearcoats to glues and other thixotropic materials.	· Allrounder: Thanks to a wide range of nozzles and diverse accessories, a wide variety of materials can be processed excellently · Simplified cleaning: The smooth surface of the spray gun body makes cleaning easier for the user · QC-Quick Change thread: Simple and fast air nozzle change with only 1.5 turns · Also for hard-to-reach areas: Thanks to the available extensions, the SATAjet 1000 B can handle hard-to-reach or narrow and deeper areas without any problem.
SATAjet 1000 B Lignum 3 26	Wood finishing requires a profound understanding for the different types of wood and for a perfect surface texture. On top of that, it requires experience as well as the perfect tool. With the SATAjet 1000 B Lignum 3, the carpenter has the best tool to give his workpiece the final touch and to achieve a perfect finish. Convince yourself now of the wide range of nozzles and accessories for good craftsmanship and perfect surfaces.	· Suitable for the application of various materials – waterborne or solvent-based · Sturdy, easy clean surface · Special nozzle sets for the application of different materials, such as adhesives, textured paints, etc. · The use of extensions from 20 – 300 cm with different spray angles is possible for special applications
SATAjet 1000 K 28	The compact and lightweight SATAjet 1000 K is the all-rounder among spray guns with material supply from pressure tanks or via double diaphragm pumps. Thanks to the wide range of nozzles, a wide variety of materials such as low-viscosity wood stains, clear coats, textured coats and glazes as well as adhesives and other high-viscosity materials can be excellently processed with this gun.	· Can be used for processing a wide variety of materials – water or solvent-based · Comfortable, ergonomically well balanced control elements, such as material flow control, the thumb-adjustable round/flat spray control and integrated air micrometer · QC thread for easy and quick air nozzle change with only 1.5 turns · Special air guides on the horns of the air cap prevent deposits caused by rear mist · With extensions in various designs, even hard-to-reach areas can be coated perfectly
SATAjet 1000 H 32	The SATAjet 1000 H RP is the all-round spray gun for craft and industry in the suction cup version.	· With 1 litre aluminum suction cup · Suitable for processing solvent-based materials · QC thread for easy and quick air nozzle change with only 1.5 turns · Easy to clean and corrosion-resistant surface · Robust and very durable
SATAjet 100 B 34	The SATAjet 100 B can be used for a wide range of applications in the car refinish market due to its flexibility in setting the atomization pressure. Due to the wide spray fan and fine atomisation, fillers and primers can be applied in a continuous flow even with the higher material viscosity. This saves valuable working time due to less sanding effort.	· Fine atomisation even at low inlet pressure · Low overspray · Pressure adjustment from 0.5 – 2.0 bar is possible · Smoothly polished, ergonomically optimised gun body · QCC- cup connection · Self-adjusting sealings

SATA

Spray Guns		Product description	Product advantages
	SATAminijet 4400 B 36	The SATAminijet 4400 B is perfectly suited for small or difficult to access areas. The special SR nozzles are suitable for small repairs (spot repair) on vehicles. All modern paint systems can be applied with this spray gun.	· Small and compact: Particularly suitable for smaller areas or hard to reach places · Special spot repair nozzle sets for minor damage repairs to vehicles · Low maintenance, self-adjusting air piston and paint needle packings
	SATAminijet 1000 K 40	The SATAminijet 1000 K series has been especially developed for the industrial coating of small to medium sized lots of small parts under series conditions. This includes, for example, the industrial series coating of small panels and housings, the application of release agents and interior design.	· Ergonomic and compact spray gun for small surfaces or areas of difficult access · QC thread for a quick air nozzle change with only 2 turns · Sturdy, easy clean surface
	SATAjet H 42	This robust and easy-to-clean spray gun is ideal for top coats and can be used in both industry and trade.	· Fine atomization – on large surfaces · High working speed · Continuous round/oval fan control · Integrated air micrometer · Material flow control
	SATA spray master RP 44	The SATA spray master RP combines trend-setting, mist reduced high pressure technology with the advantageous properties of a material pressure supported spray gun. With this unique combination, almost all paint systems of different viscosities up to thick-film glazes can be processed with excellent painting results.	· Allround talent: With the pressurised cup and the wide horn nozzle set, practically any material can be perfectly processed in carpentry and painting. · Fine atomisation: the optimized internal nozzle pressure ensures perfect results · High efficiency: the transfer rates are significantly higher than the 65% required by the VOC legislation · Low air consumption - therefore also suitable for small compressors · With the nozzle size "SM" (approx. 1.3) this gun can be used for almost any spray material - only the pressure in the cup has to be adjusted according to the viscosity.
	SATAjet 20 B 46	The SATAjet 20 B has been designed for use in all areas of creative painting: For all kinds of artbrush applications including graphic design, automotive custom painting, model making, artwork and calligraphy – the results are simply outstanding.	· Design spray gun with round spray nozzle · Ideal for right- and left-handed painters · Familiar handling due to spray-gun-like design · Material and air flow control · No tools required to change air connection - works well on horizontal as well as on vertical surfaces · Wide range of nozzle sizes for versatile use · Suitable for water and solvent-based paints

Spray Guns		Product description	Product advantages
	SATAgraph 1 48	The airbrush guns of the SATAgraph series are particularly suitable for drawing fine dots as well as filigree lines and contours. The SATAgraph 1 is the entry-level model among the SATAgraphs.	· With double action system for separate air and material control to achieve special effects · Versions with gravity flow cup or suction cup · Easy handling for fatigue-free work · Easy disassembly and assembly for cleaning and replacement of used nozzle sets
	SATAgraph 3 50	The airbrush guns of the SATAgraph series are particularly suitable for drawing fine dots as well as filigree lines and contours. The SATAgraph 3 is the professional model among the SATA airbrush guns.	· With double action system for separate air and material control to achieve special effects · Versions with gravity flow cup or suction cup · Easy handling for fatigue-free work · Easy disassembly and assembly for cleaning and replacement of used nozzle sets
	SATAgraph 4 52	The airbrush guns of the SATAgraph series are particularly suitable for drawing fine dots as well as filigree lines and contours. The SATAgraph 4 is the universal model among the SATA airbrush guns.	· Coupled air and material adjustment for safe spray control · Removable needle cap to allow drawing finest lines · Highest precision in various fields of application · Easy handling for fatigue-free work
	SATA adam 2 70	The accurate and correct setting of the gun inlet pressure is one of the key requirements to ensure perfect colour match during the painting process. Whether the pressure is set too low or too high, colour deviations will be the undesired result. The consequences are unnecessary rework disrupting the efficient work flow in bodyshops and substantially higher repair costs. "Incorrect dynamic inlet pressure" can be prevented by using SATA digital spray guns or the accessories SATA adam 2 and SATA adam 2 U. The display can be removed from the spray gun in no time at all; for example to use it on another spray gun with premounted "dock". This makes the SATA adam 2 highly flexible. The display screen always remains in the horizonzontal centre position ensuring readilbility of the pressure at all times.	· For retrofitting - turns any standard spray gun into a "digital" one · Precise setting and display of the inlet pressure - ensures perfect colour shade reproducibility · The display can be used on several SATA spray guns. SATA adam 2 U also fits on spray gun of other manufacturers - thus, your entire spray gun inventory can be "digitised" cost-efficiently · Extended battery lifetime, easy battery exchange · Display can be attached and removed in no time at all

SATA

The revolutionary nozzle system

State-of-the-art paint systems and the latest application recommendations open up new possibilities, but also pose new challenges for professional painters. The SATAjet X 5500 featuring the new X-nozzle system now defines a wholly new application standard for the future.

The concept of this nozzle system is easy and straightforward to understand: Both proven application technologies – HVLP and RP – remain available, but now each of them with the additional choice between "I" and "O"-nozzle sets. In line with the increasing nozzle sizes within each of the respective technology (HVLP / RP), the material flow rate increases too with constant increments – which means that the spray fan size and width remain unchanged across the entire nozzle spectrum. In essence, end-users can now rely on a transparent and consistent system which offers them clear and well-structured application options.

The "I"-nozzles produce a parallel spray fan pattern with a minimal dry zone and a drier centre which is ideal for painters preferring a **reduced application speed** and maximum application control during the painting process. The **film build per coat** in comparison to an "O"-nozzle of the same size is **slightly reduced**.

- Parallel spray fan with minimal dry zone
- Improved control during application
- Reduced film build per coat compared to the nozzle set currently in use or the "O"-nozzle

"O"-nozzles do have an oval-shaped spray fan pattern with a larger dry zone and a wet core to accommodate **increased application speed** at the expense of slightly less application control during the painting process. The **film build per coat** in comparison to an "I"-nozzle is **slightly higher**.

- Oval-shaped spray fan with larger dry zone
- Wet core for increased application speed
- Film build per coat slightly higher compared to the "I"-nozzle

SATAjet® X 5500 HVLP

SATAjet® X 5500 RP® Digital

SATA
PRODUCT BENEFITS

- Revolutionary: The X-nozzles are taking atomisation to a whole new level
- Noticeably quieter: Whispering nozzle™ due to optimised air flow geometry, reduced noise level in the relevant sound frequency ranges
- Individual: Matches any application requirement, such as specific characteristics of the paint system, climatic conditions and application method (application speed/ application control)
- Precise: Optimised material distribution for enhanced spraying uniformity and atomisation with both spray fan shapes
- Low maintenance: No air distribution insert required, thus also ensuring a much easier and faster cleaning process
- Consistent: Constant fan size across the entire nozzle spectrum (within each respective atomisation technology) with linear increases of the material flow rate
- Efficient: The optimised atomisation concept enables to realise considerable material savings using the same application method as before

SATAjet K 1800 spray mix

spray mix

Technical Data	SATAjet K 1800 spray mix
Recommended air inlet pressure	variable
Recommended spraying distance	18 - 25 cm
Air consumption	120 Nl/min
Max. material inlet pressure	250 bar
Spray mix gun

1091454
SATAjet K 1800 spray mix with material tube and a long material filter for insert filter, filter (100 msh), paint nozzle not included

1090076
SATAjet K 1800 spray mix with material tube and a short material filter for gap filter, filter (100 msh), paint nozzle not included

1068023
SATAjet K 1800 spray mix without material tube and material filter, without paint nozzle

Extensions for SATAjet 1000 B RP

Standard nozzle

154211
Extension with standard nozzle (0°), 20 cm with nozzle set 1.6 RP for SATAjet 1000 B RP

154229
Extension with standard nozzle (0°), 30 cm with nozzle set 1.6 RP for SATAjet 1000 B RP

154237
Extension with standard nozzle (0°), 40 cm with nozzle set 1.6 RP for SATAjet 1000 B RP

Diagonal spray nozzle

154252
Extension with diagonal spray nozzle (45°), 20 cm with nozzle set 1.6 RP for SATAjet 1000 B RP

154260
Extension with diagonal spray nozzle (45°), 30 cm with nozzle set 1.6 RP for SATAjet 1000 B RP

154278
Extension with diagonal spray nozzle (45°), 40 cm with nozzle set 1.6 RP for SATAjet 1000 B RP

178533
Extension with diagonal spray nozzle (75°), swiveling, 40 cm with nozzle set 1.6 RP for SATAjet 1000 B RP, preferably with BVD pressurized cup

185520
Extension with diagonal spray nozzle (75°), swivelling, 20 cm with nozzle set 1.6 RP for SATAjet 1000 B RP, preferably with BVD pressurized cup

Angular head nozzle

154294
Extension with angular head nozzle (90°), 20 cm with nozzle set 1.6 RP for SATAjet 1000 B RP

154302
Extension with diagonal spray nozzle (90°), 30 cm with nozzle set 1.6 RP for SATAjet 1000 B RP

154310
Extension with angular head nozzle (90°), 40 cm with nozzle set 1.6 RP for SATAjet 1000 B RP

Rotary nozzle

196162
Extension with rotary nozzle (360°), 20 cm with nozzle set 1.6 RP for SATAjet 1000 B RP, function exclusively with SATA BVD pressurized cup

196170
Extension with rotary nozzle (360°), 30 cm with nozzle set 1.6 RP for SATAjet 1000 B RP, function exclusively with SATA BVD pressurized cup

196188
Extension with rotary nozzle (360°), 40 cm with nozzle set 1.6 RP for SATAjet 1000 B RP, function exclusively with SATA BVD pressurized cup

Air cap protector, black (packing unit 5 pieces) for SATAjet 100 and 1000 series

1054030
Air cap protector, black (packing unit 5 pieces) for SATAminijet 4400 B

1054022
Air cap protector, black (packing unit 5 pieces) for SATAminijet 1000/3000 B

1040815
Air cap protector UV, black (packing unit 5 pieces) for SATAjet 3000, 4000, 5000 series

1040807
Air cap protector UV, black (packing unit 5 pieces) for SATAjet 100 and 1000 series

1044594
Air cap protector UV, black (packing unit 5 pieces) for SATAminijet 4400 B

Cleaning and Maintenance of Spray Guns

Storage

60095
SATAclean wet holding tray for 3 spray guns

Cleaning accessories

162628
SATA care set spray gun care bag containing 1 large cleaning brush, 5 medium-sized cleaning brushes, 5 double-sided cleaning brushes, 12 nozzle cleaning needles, 1 tube high performance grease, silicone- and acid-free, 100 g

48173
SATA high performance grease, silicone- and acid-free, 100 ml for spray guns

62174
SATA nozzle cleaning needles (pack of 12 pieces)

9894
SATA nozzle cleaning needles (pack of 36 pieces, packed to 12 pieces each)

64030
SATA cleaning kit with 2 cleaning brushes, medium and 12 nozzle cleaning needles

6007
Cleaning brush (packing unit 10 pieces) for spray guns
9209
Cleaning brush, double-sided (pack of 10 pieces) for spray guns

158840
Cleaning brush, large (packing unit 5 pieces) for spray guns

29280
Cleaning brush (packing unit 10 pieces) for suction pipe of suction cup spray guns

Quality Control

161596
SATA cert, with archive, spray pattern block, single sheet holder and distance marker

161646
Spray pattern blocks with 25 sheets (packing unit 2 pieces) for SATA cert

161661
Distance marker for SATA cert

Disassembly of nozzle set

1 First remove paint needle.	**2** Followed by the cap.	**3** And finally, unscrew fluid tip with the ring spanner integrated in the universal spanner.

Cleaning and drying

1 Clean the material passage	**2** Clean the spray gun body	**3** Dry with blow gun

When cleaning the spray gun manually, please ensure not to use brushes made of metal wires which could possibly damage the spray gun. Furthermore, please make sure that no cleaning fluid ends up in the air passages of the spray gun body.

Cleaning of the nozzle set

1	**2**	**3**
4	**5**	**6**
When cleaning the nozzle components, please make sure that metal parts of brushes do not damage the nozzle set. Ideally, please use specially designed SATA cleaning brushes and SATA nozzle cleaning needles to ensure optimum cleaning and maintenance of the nozzle set.
Please watch our video at www.sata.com/TV concerning "Cleaning and Maintenance of Spray Guns". Or simply order the cleaning brochure (Art. No. 158162) or the cleaning poster (Art. No. 168070) free of charge!
www.sata.com/firstaid

Assembly and maintenance

1 Assembly of the fluid tip	**2** Tighten fluid tip by hand using the universal spanner.	**3** Assembly of the air cap
4 Grease paint needle around the needle packing area	**5** Insert paint needle	**6** Grease and insert paint needle spring
7 Grease thread of material flow control screw	**8** Install material flow control screw	**9** Grease visible part of air piston rod
Cup Systems	Product description	Product advantages
SATA RPS Multi-Purpose Cup System 80	The SATA RPS (Rapid Preparation System) multi-purpose cup system fulfils four functions: mixing, painting, refilling and storing. The handling of SATA RPS is so simple because it consists of only three parts: SATA RPS fits directly onto your SATA spray gun with QCC connector (Quick Cup Connector) without any disturbing adapters. Due to the short colour channel and without unnecessary corners and edges, material deposits in the colour channel are prevented.	· Bendable – allows the painting of sill areas or wheel arches "overhead" · Stable – due to the screw connection between cup and lid, the cup always remains on the lid and gun even when touching obstacles. · Easy removal of the lid in case of emergency – without soiling the working area · Clean removal of the cup – by pressing the cup in, vacuum is created, which empties the material passage when pulling the trigger. · Constant material flow – helps the painter to achieve perfect coating results just like child's play · Very quick colour change – Cleaning becomes a minor matter · Available in 3 cup sizes: 0.3 l, 0.6 l and 0.9 l · Available as UV version: 0.6 l
Gravity flow cup for spray guns 86	Reusable plastic or aluminium gravity flow cups for SATA spray guns	· Proven SATA quality · Flexible in use
SATA agitator cup 90	The SATA agitator cup is the ideal cup for processing quick settling materials, such as effect paints. The reusable aluminium cup fits directly onto your SATA paint spray gun with QCC (Quick Cup Connector) connection – without the need of adapters. Due to the short colour channel and without unnecessary corners and edges, material deposits are also prevented.	· Variable - Air control valve allows adjustment of inlet flow pressure and agitator speed · Clean – Drip stop in the lid supports clean working · Constant material flow – helps the painter to achieve perfect coating results
SATA BVD 92	The SATA BVD is ideal for low-mist processing of highly viscous, sprayable materials.	· No modification of the viscosity required · Individual material pressure adjustment · Female thread connection optional for older spray guns

SATA RPS Multi-Purpose Cup System

SATA RPS 0,3 l

1010389
SATA RPS 0.3 l standard, 125 µm flat sieve packing unit 40 pieces

1010420
SATA RPS 0.3 l standard XL, 125 µm flat sieve packing unit 100 pieces

1010397
SATA RPS 0.3 l standard, 200 µm plug-in sieve packing unit 40 pieces

1010404
SATA RPS 0.3 l standard XL, 200 µm plug-in sieve packing unit 100 pieces

SATA RPS 0.3 l for SATAminijet spray guns (except minijet 4400 B)

1010553
SATA RPS 0.3 l minijet, 125 µm flat sieve packing unit 60 pieces

1010561

SATA Loyalty Program
coins & more

We reward your customers with SATA coins

Purchasing SATA products is twice as rewarding: you can achieve perfect finishes and as a participant in the SATA Loyalty Program coins & more you can collect SATA coins and redeem them for valuable rewards.

Many SATA products are delivered with a QR code of the SATA Loyalty Program coins & more. You can scan the Loyalty QR codes with the SATA Loyalty App to collect SATA coins, which can then be redeemed for valuable rewards in the Loyalty Shop.

Benefit from the SATA customer loyalty program and its advantages:

- High-quality SATA product with bonus thanks to the SATA coins
- Many SATA products with Loyalty QR code to collect SATA coins
- Further options to collect coins in the SATA Loyalty App
- Wide range of rewards including SATA products
- Exclusive rewards and special prices during certain promotional periods

Breathing Protection

Hood cloth
Breathable, solvent-resistant, lint-free and flame retardant. Quick exchange due to velcro attachment system.

Comfort head band
To ensure highest hygiene standards. Made of microfibre velour, dermatologically tested; can be exchanged within a few seconds only; includes foam insert for enhanced wearer comfort.

SATA CCS discs
Allows the convenient individual identification to avoid confusion; available in 4 colours.

Locking/pivot control
Allows easy visor location.

Facial seals
Follows facial contours ensuring optimum seal and comfort. Low reflection due to dark colour.

Breathing air hose
for fresh air supply. Hose guide on the rear for maximum comfort.

Diffusor block
Breathing air distribution reduces the noise level to 64 dB(A) at 2.5 bar inlet pressure.

Hood
With rigid skull cover providing impact protection whilst working in confined areas.

Headband
Can be adjusted at 4 different points ensuring perfect fit.

Visor
With large field of vision

Plug-in diffuser
optional accessory – to avoid uncomfortable air flow.

Accoustic warning signal
Instant indication of insufficient air supply.

Breathing Protection	Product description	Product advantages
SATA air vision 5000 98	The SATA air vision 5000 offers a completely redesigned way of supplied breathing air. The respiratory hood not only ensures high breathing air quality but also a low noise level. The modern, ergonomic design fits with almost any head shape and can be individually adjusted in size, height and position.	• Absolute safety through external supply of clean air to the cabin – up to 100 times TRK value and suitable for continuous use • No inhalation resistance, very comfortable breathing • Ergonomic design with individual adjustment options and one-hand operation of the visor • Little operating costs, quick pay-off of purchase costs • Soft-stream flow-optimised air distribution in the hood • Reduced sound level: 64 dB (like a conversation in 1m distance) • The SATA CCS Discs (Color Code System) allow to personalise hood, SATA air regulator and SATA air carbon regulator • Single solvent resistant tear off visors over an aperture in the front of the mask, ensuring 100% visibility and reduction in light reflections.
SATA vision 2000 102	This full hood is especially designed to meet the requirements of painters and protects the respiratory system, eyes, skin and hair. In addition, it offers a high wearing comfort and optimum hygiene. The hood with hygienic hood insert, replaceable sweatband and acoustic warning device is available as a set. This includes a belt unit – optionally with activated carbon adsorber and air flow regulation and display or a T-piece with an air flow regulation.	• High breathing air quality due to air supply independent of ambient air, no inhalation resistance, high breathing comfort • High protection level, suitable for long application intervals • Protects up to 100 times the TRK-value • Visor allows one-hand operation • Single solvent resistant tear off visors over an aperture in the front of the mask, ensuring 100% visibility and reduction in light reflections. • Little operating costs, quick pay-off of purchase costs
SATA air star C 104	The SATA air star C half mask offers maximum visibility and better breathing protection than half masks with filter cartridges. The activated carbon filter, either as a static unit on the wall or portable on the belt unit, provides clean breathing air. The optimally filtered air is supplied to the user directly into the mask, in a steady stream without any inhalation resistance.	• Ambient air independent supply of pure breathing air (protects up to 100 times the TRK value)' also outside the paint booth • No inhalation resistance, very comfortable breathing • Free vision (protective goggles required) • No accumulation of heat and humidity inside the mask • Excellent fit for any type of facial contours • Very light and comfortable • 4 pointed straps for easy handling and safe fit
SATA air star F 108	With this easy-to-wear filter half mask, painters are completely independent of location. A powerful filter system protects the respiratory tract of the painter as much as possible. It is mainly used for preparatory work outside the paint booth or for less extensive painting jobs. The SATA air star F has an anatomically shaped mask body made of skin-friendly TPE (Thermoelastic Elastomer) which adapts to any face shape.	• Unrestricted mobility • Small investment • High wearing comfort, free field of view (goggles required) • Easy to handle and fits securely • Pre-filters to extend the lifetime • Relatively low inhalation resistance

13870 Gun air hose 9 mm inner diameter, 1.2 m to connect a spray gun to the belt unit
1115189 Activated charcoal filter for SATA air carbon regulator

Compressed air-supplied respirator hood to combine with double-stage compressed air filters fixed to the wall, e.g. SATA filter 544 **without** integrated activated charcoal filter stage.

Please order the gun **air hose #13870** for the best connection between air regulator and spray gun.

SATA air vision 5000

Filter Technology

Air outlet module – extendable if required

Large pressure regulator for a precise setting of the required outlet pressure

SATA filter timer to monitor the filter cartridge exchange intervals of all filter stages

Air inlet G ½ " female thread;

Flow-optimized cyclone separator with high separation efficiency of particles > 5 µm

Automatic condensate discharge valve – high operating security, low service requirement

Air flow at 6 bar (87 psi): 3,800 Nl/min (135 cfm)
In-line installation from the left or the right side possible

Air outlet with ball valves (¼" male thread) – (optional: SATA high flow quick couplings)

First filter stage:

- Sintered filter to separate particles > 5 µm
- Cleaning and exchange interval: 6 months

Second filter stage:

- Fine filter cartridge to separate particles > 0.01 µm
- Separation efficiency: 99.998 %
- Exchange interval: 6 months

Third stage:

- Sintered activated charcoal cartridge with higher separation efficiency of oil vapours
- Suitable for the use of compressed air-supplied breathing masks
- Exchange interval: 6 months

Filter Technology	Product description	Product advantages
SATA filter 584/564/544/524 112	The SATA filter series 500 is available either as a one-stage sintered filter with water and oil separator, as a two-stage combination filter with sintered and fine filter, or as a three-stage filter unit with additional sintered activated charcoal filter.	· Higher absorption of contaminations (compared to SATA filter 484) due to the new sintered activated charcoal filter · Synchronised maintenance: Filter maintenance only necessary every six months for all stages · Maintenance-free bayonet lock with haptic and acoustic feedback · Fine filter and activated charcoal filter cartridges fit perfectly by simply being inserted – no screw fittings or additional seals · Simple plug-in system for upgrading SATA filter 544 to 584 · Maintenance-free sealing elements · Line connection possible either from the left or the right side · Air flow at 6 bar: 3,800 Nl/min
SATA filter 103 prep/101 prep/100 prep 118	The SATA filters 100 prep and 103 prep have been specially developed for the requirements at the work preparation area. By using these filters, coating flaws can be avoided from the beginning. Not suitable for use in spray booths.	· Finest particles are separated down to a size of 0.1 μm · The first filter stage with large cyclone separator and sinter filter reliably removes oil droplets, condensate and suspended particles from the compressed air. · The second filter stage, the microfiber fine filter, separates fine particles down to a size of 0.1 μm · The third filter stage with activated charcoal provides the highest level of safety when processing waterborne primer materials. · The automatic condensate drain of the 1st filter stage keeps the service effort low and increases the operational reliability · Pressure regulator valve with gauge for precise adjustment of the outlet pressure · Ideal for the work preparation area with temperatures < 50 ° C · Air flow rate 800 Nl/min at 6 bar inlet pressure.

SATA filter
584/564/544/524

Technical Data	SATA filter 584/564/544/524
Max. air flow	3800 Nl/min
Max. allowed ambient temperature (with activated charcoal / without activated charcoal)	+60 °C; +120 °C
Max. air inlet pressure	15,0 bar
Thread connection inlet side	G 1/2" (female thread)
Exchange interval first filter stage	6 Months
Exchange interval second filter stage	6 Months
Exchange interval third filter stage	6 Months

Additional products	Product description	Product advantages
SATA mini set 2 126	The SATA mini set 2 pressure pot processes materials up to two litres. Due to the double pressure reducer, an optimum pressure of material and atomising compressed air is achieved. The pulsation-free and even material supply enables perfect painting finishes and saves time due to continuous work without interruptions.	· Time saving through continuous working without interruption · Unrestricted mobility thanks to the shoulder belt - especially in commercial vehicles as well as when using ladders or scaffolding · For supplying material pressure fed spray guns, such as the SATAjet 3000 K
SATA paint set 10 128	The SATA paint set 10 liter is a robust paint pressure tank made of stainless steel for processing material up to a volume of 10 litres. The air atomizing painting system is ideal for processing large amounts of material.	· Flexible – ideal for combination with all material-fed SATA high and low pressure guns · Versatile – for use with paints, architectural coatings, dispersions, spray plasters, adhesives and release agents · Individual solutions possible – Extensive range of accessories such as double pressure reducers, electric, pneumatic and manually operated agitators, trolleys, connection for a second paint spray gun as well as a special version for processing water-based systems
SATA Paint Pressure Tanks 24 l / 48 l 130	The robust SATA material pressure tanks made of stainless steel are suitable for processing large amounts of material up to a volume of 24 or 48 litres.	· Special versions - with bottom outlet for particularly high viscosity materials · Flexible – ideal for combination with all material-fed SATA high and low pressure guns · Individual special solutions - with a comprehensive accessories programme, such as double pressure reducer, electronic, pneumatic and manual agitators, trolleys, connections for a second spray guns as well as insert pots.
SATA vario top spray 134	The high-performance double diaphragm pump SATA vario top spray is the perfect system for continuous application of larger material amounts. The SATA vario top spray is a real problem solver in vehicle and industrial painting, in machine construction, as well as in wood and furniture painting. All solvent-based paint systems of the most varied viscosities and structures, but also water-based paints, can be processed without problems.	· Efficient - continuous operation and high area output · Versatile - finest atomization of pre- and topcoats with proven and high-quality SATA paint spray guns · Variable - modular device design for optimum adaptation to any task · High performance and low wear - through proven double diaphragm technology · Robust stainless steel design for water-based paint systems
Grit blasting equipment / Blow Guns / Bodyshop equipment 138	The versatile grit blasting unit with suction system removes rust and makes surfaces adhesive. For car repair, carpenters, painters and for the industry. The SATA blasting set consists of the SATA blasting spray gun, protective hood and gloves.	· Spraying pipe with carbide insert (lifetime of spraying pipe approx. 500 h), cup and quick release fastener · Abrasive grain size 0.1 – 0.6 mm · Air consumption approx. – 700 Nl/min at 5 – 10 bar

Additional products	Product description	Product advantages
Rustproofing equipment 140	High-performance equipment for the application of different materials for cavity preservation and underbody protection. The SATA-HRS pressurised cup spray gun for cavity preservation uses compressed air atomising technology. Particularly in the case of cavity preservation, many years of experience have shown that air-atomizing overpressure systems are ideally suited to transport preservation waxes evenly and finely atomized into every corner of the cavity. In the field of corrosion protection, a wide range of cavity wands and nozzles is available for the application of standardized as well as VOC-compliant, high-solids wax materials.	· Efficient application of rust-proofing wax in vehicle cavities · Possibility of using different wand systems for cavity preservation and underbody protection · Low wear and maintenance, sturdy version for bodyshops · For all purposes – also for the application of large surfaces with special wand and nozzle systems · Easy coupling system for quick wand exchange
SATA clean RCS 144	The SATA clean RCS is a compressed air operated cleaning system for the intermediate cleaning of the spray guns. SATA clean RCS – the turbo cleaner in the spray booth allows one or more colour changes in succession with extremely short cleaning interruptions, saving additional working distances and increasing productivity and efficiency.	· Quick and safe colour changes when using multi-purpose cups (such as SATA RPS) - even with critical colour changes, e.g. black and white · No need to disconnect the spray gun or adjust the inlet pressure - automatic pressure adjustment when switching between "spraying" and "cleaning · Increased efficiency - through optimized work processes and booth utilization · Thorough - Cleaning the material passage and the air nozzle · Universal - suitable for water- and solvent-based coating systems
SATA multi clean 2 147	Paint spray guns should be thoroughly cleaned at least once a day and rinsed after each painting job. This can be done gently, conveniently and economically with the SATA multi clean 2 – the powerful automatic washing machine with hand washing place and extraction unit.	· Brush soaked in cleaning agent for manual cleaning · Low-pressure air connection to prevent cleaning solution from penetrating the air passages of the spray gun during the cleaning and rinsing process. · Powerful, pneumatically operated double diaphragm pump – robust and low-wear · Two separate storage containers for the cleaning and rinsing cycle · Only 0.2 l of fresh cleaning solution needed for each cleaning cycle – fresh cleaning solution is only required for the rinsing process · Replaceable filter mat (Art. No. 38042) to absorb coarse residues · Automatic fume extraction system protects the painter from harmful vapours whilst the lid of the cleaning chamber is open
SATA trueSun 148	The SATA trueSun daylight solution has a wide colour spectrum and reproduces colour tones true to original: The even light distribution over the illuminated surface reliably helps bodyshops to find the right colour and to avoid wrong decisions and thus extra work. The continuously adjustable light intensity remains constant over the entire battery life.	· Almost like daylight - best possible colour reproduction and visibility of effect pigments · Uniform light distribution - across the entire light cone · Strong and fast-charging battery - approx. 70 minutes operating time at full light intensity and full charging cycle in approx. 50 minutes · Constant light intensity – independent of the battery charge state · Infinitely adjustable light intensity · Paint defects such as cloudiness can be easily detected

SATA

Additional products	Product description	Product advantages
SATA dry jet 2 150	With the SATA dry jet 2 dry blow gun, you can significantly shorten the flash-off and thus the cabin occupancy times. It uses the so-called Venturi principle. In addition to the supplied compressed air, a multiple of ambient air is sucked in. The uniform, wide air flow generated in the injector zone of the wide spray nozzle also contributes to a reduction in flash-off time. Thus, the SATA dry jet 2 achieves an approx. 15 % higher drying performance compared to commercially available models.	· Shorter drying times with water-based paint systems · Low investment costs · Practical product versions · Integrated air regulation · Disposable sieve from the RPS multi-purpose cup system · Ergonomic handle · Easy handling · Long lifetime and low-maintenance

SATA mini set 2

Technical Data	2 l
Air connection thread	1/4" (male thread)
Material connection thread	1/4" (male thread)

63479	
Flat valve 24 x 19 mm, for SATA Top- Spray double diaphragm pump	
63487	
Carrier rod D 13, 9L, for SATA Vario Top-Spray double diaphragm pump, complete with O ring 10,82 x 1,78	
63495	
Valve seat D 48 mm for SATA Vario- Top-Spray double diaphragm pump	
90720	
Silencer	

SATA
Spare parts

Material fine pressure regulator

149740	
Gasket for gravity container	
149948	
Flat sieve 20 mesh (packing unit 2 pieces)	
156026	
Pressure gauge 0 – 6 bar, 50 mm, G 1/4	
21998	
Pressure plate	
22376	
Compression screw	
29918	
Circlip for suction globe Spray-Mix, Vario-Top-Spray and Multi-Top	
78766	
Sleeve nut for ball valve	
78774	
Insert part for material fine pressure regulator SATA vario top spray	
78824	
Pressure spring for material fine pressure regulator SATA vario top spray	
78832	
Tappet for material fine pressure reducer Vario-Top-Spray	
7989	
Ball tap (Teflon) G 3/8" (female thread)	
80283	
Diaphragm	
80291	
Plunger kit, cpl.,	
Grit blasting equipment / Blow Guns / Bodyshop equipment

Grit blasting equipment

38166
SATA grit blasting set SGE with trolley, with grit blasting gun with carbide pipe, mask, container, w/o grit material

39172
SATA sand blasting-set: sand blast. gun c/w carbide pipe, mask and gloves

17335
SATA grit blasting gun super version spraying pipe c/w carbide insert

Blow guns

15180
SATA blow gun with low noise metal nozzle and quick coupling nipple (blow gun)

77586
Special low noise nozzle for SATA blow gun 15180 (blow gun)

15214
SATA blow gun with multi nozzle and quick coupling nipple (blow gun)

26047
Metal-multi-nozzle M 14x1 for SATA blow gun 15214 (blow gun)

15156
SATA blow gun with standard nozzle (blow gun)

26070
Standard nozzle for SATA blow gun 15156 (blow gun)

133306
SATA turbo blow with quick coupling nipple (blow gun)

Spare parts
Grit blasting equipment

12831	
Hexagon nut M 14 x 1.5, galvanised	
17699	
SATA HMO head protection hood	
21154	
Blast pipe w. carbide insert f. SATA grit blasting gun	
21220	
Hose olive with 1/4" (male thread)	
21444	
0.6 l plastic suction cup without lid	
21451	
Lid for 0.6 l PVC suction cup	
27631	
Ball tap (Teflon) 1/4" (male thread) x G 1/4" (female thread)	
27722	
SGE Air hose 9 mm ID, length 10 m	
27730	
SGE paint hose 6 mm ID, length 5 m with ascension pipe	
27755	
Ascending pipe, only, for SGE set	
33696	
Lid, cpl.	
36194	
SGE container f. grit blasting material, empty	
38141	
SATA SGE gun with carbide spray pipe	
64394	
Plastic disc (5 pieces)	
64402	
Glass visor screen (5 pieces)	
Rustproofing equipment

SATA HRS

24018
SATA HRS complete pressurised cup gun with 1.0 l cup (max. 10 bar), without material flow control with nylon wand 16105 and hook wand 24372

9795
SATA HRS pressurised cup gun with 1.0 l cup (max. 10 bar), without material flow control, flexible nylon and hook wand (16113 and 16139) as well as fix door wand (16071)

12658
SATA HRS pressurised cup gun with 1.0 l cup (max. 10 bar), material flow control, without wands

11072
SATA HRS pressurised cup gun with 1.0 l cup (max. 10 bar), without material flow control, without wands

SATA HRS E

172882
SATA HRS-E pressurised cup spray gun with 1.5 l cup (max. 10 bar), for cavity preservation and underbody protection from disposable containers, with material flow control, round spray nozzle 25486, hook wand 16139 and nylon wand 11874

207290
SATA HRS E pressurised cup spray gun with 1.5 l cup (max. 10 bar) for cavity preservation and underbody protection from disposable containers, with material flow control, hook wand 16139 and nylon wand 16113 as well as round spray nozzle

77347
SATA HRS-E with 1.5 l pressurized cup (max. 10 bar), with material flow control, without wands

Door wand

16071
Door wand, steel 1100 mm long, Ø 8 mm, with rotary nozzle 360° and spraying forward

196832
Door wand, steel 150 mm work length, Ø 8 mm, with rotary nozzle 360° rotary fan and spraying forward, with flexible guideway hose 1000 mm

Nylon wand

1058826
Nylon wand, flexible 3000 mm long, Ø 8 mm, with rotary nozzle 360° and spraying forward

11874
Nylon wand, flexible, 1500 mm long , Ø 6 mm, with rotary nozzle 360°, diagonally spraying forward and backward

16105
Nylon wand, flexible, 1500 mm long, Ø 6 mm, with rotary nozzle 360°

16113
Nylon wand, flexible, 1300 mm long, Ø 8 mm, with rotary nozzle 360° rotary fan and spraying forward

51185
Nylon wand, semi rigid 1500 mm long, Ø 6 mm, with rotary spray nozzle 360° and spraying diagonal forward and backward

Hook wand

11866
Venturi hook wand Ø 5 mm, with flexible guide hose, Venturi spray tube for cavity and surface application

16139
Venturi hook wand, Ø 7 mm, with flexible guiding hose, Venturi spray tube for cavity and surface application

206904
Venturi hook wand Ø 5 mm, hook nozzle cpl. in 300 mm length, with flexible guide hose, Venturi spray tube, for cavity and surface application

24372
Hook wand Ø 5mm, with flexible guide hose, hook flat nozzle, for cavity and surface application

Round spray nozzle

198762
Round spray nozzle for surface application with flexible guide hose for underbody protection

25486
Round spray nozzle for HRS, conn. I

Coupling and connection

16048
SATA quick coupling nipple 1/4" (male thread) for wands

8359
Free passage type quick coupling for HKD1, LM/KK, HRS , connection I

Barrel pump unit for cavity preservation

14555
SATA HKU 60 l barrel pump unit cpl., consisting of piston pump 1:3, with hose pair 10 m, SATAjet 1000 KK spray gun, nylon, door and hook wand

34389
SATA HKU 200 l barrel pump unit, cpl., consisting of piston pump 1:3 with hose pair 10 m, SATAjet 1000 KK spray gun, nylon, door and hook wand

153700
SATAjet 1000 KK RP nozzle 1.5 with paint tube, 1/4" (male thread) with coupling (Art.-No. 8359)

Underbody protection

12740
SATA UBE gun type I, for underbody coating with one-way cans

Barrel pump unit for underbody protection

128561
SATA spray mix underbody protection system 1:22, hose pair 10 m, SATAjet 3000 K spray mix gun nozzle 3350, for 60/200 ltr. barrel

Spare parts
SATA HRS

Part	Description
10322	Guide sleeve complete, for HRS with material flow control
11437	Closing screw
11445	Pressure spring for air piston
11460	Air piston
11494	Cam rod HRS, complete with O-ring
11502	Paint needle 1.5
11510	Mixing cap HRS, completely machined
11544	Pressure spring for paint needle
12591	Bracket bolt
133983	Air connection piece 1/4" male thread
15438	Paint needle packing
157305	Trigger
182	Counter nut
208	Material flow control nut
3426	Safety washer 4 mm DIN 6799 stainless steel for trigger
38034	Paint needle, cpl., for HRS, with needle stroke and minimum passage control
41806	1.0 l aluminium pressure pot, max. pressure 10 bar/150 psi, cpl. with threaded ring
53082	O-ring
68890	Inflow valve
8300	Suction pipe
8318	Sealing ring
8359	Free passage type quick coupling for HKD1, LM/KK, HRS , connection I
Repair kit

9779	Repair kit SATA HRS until 2009
161158	Repair kit SATA HRS as of 2010
35204	Wear-and-tear parts kit for HRS

SATA clean RCS

Technical Data	SATA clean RCS
Width	31 cm
Height	70,5 cm
Depth	22,5 cm
Weight	10 kg
Max. inlet air pressure	8,0 bar
Air consumption	135 Nl/min
Air connection thread	1/2" (male thread) + G1/4" (female thread)
Place of installation	inside the spray booth

SATA clean RCS

145581
SATA clean RCS - the turbo cleaner

Recommended connection accessories (depending on the installation method)

10934
Ball tap (Teflon) 1/2" male thread for air inlet SATA filter series 100, 300, 400, 500 and cleaning devices

13581
SATA quick coupling G 3/8" (female thread)

13623
SATA quick coupling 1/4" (male thread)

13870
SATA air hose, blue, 9mm, 1.2 m with quick coupling, red and nipple

146514
SATA air hose, blue, 13 mm, 0.5 m, G 1/2" (female thread), one connection included for SATA clean RCS

192633
Add-on kit: Suction hose for solvent vapours for SATA clean RCS compact / micro

53090
SATA air hose, blue, 9mm, 10 m with quick coupling, red and nipple

Other accessories/spare parts

146985
Repair kit SATA clean RCS / compact / micro

146993
Splash guard with fixing rivet (each 5 pieces) for SATA clean RCS / compact / micro

SATA

Sidebar: SPRAY GUNS | CUP SYSTEMS | BREATHING PROTECTION | FILTER TECHNOLOGY | ADDITIONAL PRODUCTS | MERCHANDISING ITEMS
Other accessories/spare parts

147082
Grounding cable, 3 m, 4 mm²

153965
Hose, transparent, 8 x 1, 95 mm, for spray guns with adapter (packing unit 2 pieces) for SATA RCS cleaning devices

189472
Conversion kit external cleaning agent - suction and recirculation for SATA clean RCS / compact / micro

192195
SATA universal spray gun and hose holder for all SATA spray guns

53942
Nipple G 1/4 f. GS respirator, UBE + blow-off gun, size 14

6981
SATA quick coupling nipple G 1/4" (female thread) (packing unit 5 pieces)

9886
SATA gravity gun holder for gravity cup spray guns

SATA clean RCS compact / micro

189472
Conversion kit external cleaning agent - suction and recirculation for SATA clean RCS / compact / micro

6981
SATA quick coupling nipple G 1/4" (female thread) (packing unit 5 pieces)

SATA

SATA multi clean 2

Technical Data	SATA multi clean 2
Width	66 cm
Height	100 cm
Depth	38 cm
Weight	30 kg
Max. inlet air pressure	6,0 bar
Air consumption	270 Nl/min
Air connection thread	G 1/4" (female thread)
Place of installation	outside the spray booth

SATA multi clean 2

38257
SATA multi clean 2 spray gun washing machine with exhaust, 2 fluid containers, trolley, spare filter mat,
quick coupling nipple for air connection

Spare parts and accessories

21188
Pressure reducer with gauge 0 – 10 bar for SATA multi-clean 2

26815
Flexible aluminium tube, 5 m long, complete with two tube fittings, for suction unit SATA multi-clean-2

38042
Filter mat for SATA multi clean 2

40840
Cup lid holding for SATA multi clean 2

40907
Spring clasp (packing unit 3 pieces) for SATA multi clean 2

48330
Blow cycle knob with valve, cpl. for SATA multi clean 2

49072
Cleaning agent container with lid for SATA multi clean 2

SATA trueSun

Technical Data	SATA trueSun
Net weight	0,47 kg
CRI value	97
Light Intensity	22000 lx
Operating time	70 min
Charging cycle	50 min

Available versions

1006411
SATA trueSun, incl. battery charger and battery, EU

1013094
Storage Case SATA trueSun, incl. foam inlay

1013151
Foam inlay with pinched inlay for storage case SATA trueSun

1007154
Battery charger EU for SATA trueSun

Spare parts

SATA dry jet 2

Technical Data	SATA dry jet 2
Weight	0,432 kg
Air consumption	270 Nl/min
Recommended air inlet pressure	2,5 bar
Max. operating pressure	10,0 bar

Available versions

217489
SATA dry jet 2 blow gun

SATA dry jet stand (adjustable height: 30 - 190 cm)

223008
SATA dry jet 2 stand with height-adjustable bracket, 2 blow guns

84145
Height extension approx. 120 cm, stainless steel for SATA dry jet stand

Spare parts

SATA dry jet 2

1024257	
Spare flat sieve 200 µm, pastel green (packing unit 10 pieces)	
123786	
Cross piece, cpl. for dry-jet 2	
222232	
Filter holder	
223834	
Flat fan nozzle	
82198	
Stand for SATA dry jet without blow guns	
83840	
Stand, complete, for Vario-Top-Spray and dry-jet, can be disassembled	
84145	
Height extension approx. 120 cm, stainless steel	
86165	
Conversion kit for SATA dry jet, adjustable version	
SATA hoses

Breathing air hoses, complete

49080	SATA Safety compressed air supply hose Ø 10 mm, 6 m long, for SATA breathing protecion systems
176792	SATA safety compressed air supply hose Ø 10mm, 10 m long for SATA breathing protection systems
180851	SATA safety compressed air supply hose Ø 10mm, 40 m long for SATA breathing protection systems

Air hoses, complete

37655	SATA air hose, blue, 9 mm, 6 m with quick coupling, red and nipple
195420	SATA air hose, blue, 9 mm, 7.5 m with quick coupling, red and nipple
53090	SATA air hose, blue, 9mm, 10 m with quick coupling, red and nipple
189068	SATA air hose, blue, 9 mm, 15 m with quick coupling, red and nipple
9902	SATA air hose, blue, 9 mm, 10 m long, G 1/4" (female thread)
51300	SATA air hose, blue, 13 mm, 10 m long, G 1/2" (female thread) for SATA vario top spray and FDG with 2. spray gun outlet
4754	SATA air hose, blue, 6 mm, 10 m long with quick coupling and nipple
13870	SATA air hose, blue, 9mm, 1.2 m with quick coupling, red and nipple
54353	SATA PVC air hose, transparent, 2 m long with mini quick coupling, nipple with G 1/4" (female thread) and quick coupling nipple for SATAminijet 4400 B, minijet 3000 B and jet 20 B
32987	SATA PVC compressed air hose, transparent, 3 m long with G 1/4" (female thread), mini quick coupling and nipple for SATAjet 20 B
134791	SATA Fibre air hose, 2.5 m long with G 1/4" (female thread), mini quick coupling for SATAgraph 1 / 2 / 3 (jet 20 B)

Hose pairs for SATA paint pressure tanks and SATA vario top spray

147520	SATA hose pair 9 x 9 mm, 6 m, with covering fabric netting, G 3/8" and G 1/2" (material), G 1/4" (air) (female thread) for SATA FDG and vario top spray
147512	SATA hose pair 9 x 9 mm, 10 m, with covering fabric netting, G 3/8" and G 1/2" (material), G 1/4" (air) (female thread) for SATA FDG and vario top spray
147504	SATA hose pair 9 x 9 mm, 15 m, with covering fabric netting, G 3/8" and G 1/2" (material), G1/4" (air) (female thread) for SATA FDG and vario top spray
19869	SATA hose pair 9 x 9 mm, 1.5 m, G 3/8" and G 1/4" (material), G 1/4" (air) (female thread) for SATA mini set 2
77834	SATA hose pair 9x9mm, 6m, with covering fabric netting, G3/8" and G1/2" (mat., stainless steel), G1/4" (air) (female) SATA FDG + vario top spray
77842	SATA hose pair 9x9mm, 10m, with covering fabric netting, G 3/8" and G 1/2" (mat., stainless steel), G 1/4" (air) (female) SATA FDG+vario top spray
77859	SATA hose pair 9x9mm, 15m, with covering fabric netting, G 3/8" and G 1/2" (material, stainless steel), G 1/4" (air) SATA FDG and vario top spray
160994	Protective Sleeve for hose pair individual 6m
161000	Protective Sleeve for hose pair individual 10m
161018	Protective Sleeve for hose pair individual 15m
7047	Hose clips (10 pieces) for air hose and material hoses, 9 mm

Hose pairs for SATA material pressure tanks and SATAminijet 1000 K

187708	SATA hose pair 6 x 6 mm, 3 m, G 1/4" (female thread) (material and air) for SATA mini set 2
187716	SATA hose pair 6 x 6 mm, 6 m, G 1/4" and G 1/2" (material), G 1/4" (air) (female thread) for SATA FDG / SATA vario top spray
187724	SATA hose pair 6 x 6 mm, 10 m, G 1/4" and G 1/2" (material), G 1/4" (air) (female thread) for SATA FDG / SATA vario top spray
187732	SATA hose pair 6 x6 mm, 15 m, G 1/4" and G 1/2" (material), G 1/4" (air) (female thread) for SATA FDG / SATA vario top spray

SATA

Hose pairs and duo hoses for SATA spray mix units

19984	SATA spray mix hose pair, 6 x 4 mm, 5 m, G 1/4" (female thread) (material and air)
19992	SATA spray mix hose pair, 6 x 4 mm, 10 m, G 1/4" (female thread) (material and air)
20008	SATA spray mix hose pair, 6 x 4 mm, 15 m, G 1/4" (female thread) (material and air)
1006099	SATA spray mix hose pair, 6 x 4 mm, 15 m long, material connection M16x1.5 (female thread), air connection G 1/4" (female thread)
1006081	SATA spray mix hose pair, 6 x 4 mm, 10 m long, material connection M16x1.5 (female thread), air connection G 1/4" (female thread)
1006106	SATA spray mix hose pair, 6 x 4 mm, 5 m long, material connection M16x1.5 (female thread), air connection G 1/4" (female thread)
97022	SATA spray mix hose pair with covering fabric netting, 6 x 6 mm, 7.5 m, G 1/4" (female thread) (material and air)
97030	SATA spray mix hose pair with covering fabric netting, 6 x 6 mm, 15 m, G 1/4" (female thread) (material and air)

Air hoses, unassembled

50252	SATA air hose, blue, 9 mm, 6 m
50591	SATA air hose, blue, 9 mm, 10 m
50641	SATA air hose, blue, 9 mm, 15 m

Material hoses, unassembled

49155	SATA material hose, green 9 mm, 6 m
49999	SATA material hose, green, 9 mm, 10 m
50161	SATA material hose, green, 9 mm, 15 m

Components for the quick coupling system

13508	Nipple 3/8" (male thread) for SATA quick coupling
13516	Nipple G 3/8" (female thread) for SATA quick coupling
13524	Nipple 1/8" (male thread) for SATA quick coupling
13557	Hose olive 9 mm for air quick coupling
13565	Connection piece 103/6 f. SATA quick coupling 103/6 f. 6 mm inside dia.
13581	SATA quick coupling G 3/8" (female thread)
13599	SATA quick coupling G 1/4" (female thread)
13607	SATA quick coupling G 3/8" (male thread)
13615	SATA quick coupling 1/2" (male thread)
13623	SATA quick coupling 1/4" (male thread)
13631	SATA quick coupling, red, with hose olive 9 mm
13649	SATA quick coupling with hose olive 6 mm
53942	Nipple G 1/4 f. GS respirator, UBE + blow-off gun, size 14
6981	SATA quick coupling nipple G 1/4" (female thread) (packing unit 5 pieces)
7237	SATA quick coupling, red with hose olive 9mm and quick coupling nipple G 1/4" (female thread) (each 2 pieces)
